Le foto dalla n.1) alla n. 81) raffigurano l'interno e l'esterno del ristorante con gli ambienti degli impianti elettrici e gas. Il ristorante ha due accessi opposti, è costituito da una elegante sala con circa centoventi coperti con ambiente climatizzato. La sala è dotata di ampie vetrate che guardano la valle sottostante, ed ha anche un impianto di videoproiezione. I servizi igienici annessi, eleganti e funzionali, sono dotati anche di wc per disabili. La cucina a servizio del ristorante è ampia e molto funzionale e pulita. Inoltre, il ristorante è dotato di una bottaia a clima controllato e quindi altamente tecnologica e con annessa una galleria per l'esposizione e degustazione dei vivi. Il ristorante ha un accesso carrabile e quindi raggiungibile tramite strada privata che giunge dalla via principale comunale, ma come tutto l'edificio risulta intercluso in terreni non sottoposti a giudizio. Detti terreni costituiscono degli eleganti giardini attrezzati a servizio del ristorante per eventuali cerimonie all'aperto.
